Attorney Docket No. 042390.P5120D

In the claims:

Please cancel claim 23 and amend claim 19 as shown. A marked-up version of the amended claims is in Appendix A at the end of this document. A clean version of all pending claims after the amendment is shown below:

CLEAN VERSION OF CLAIMS AFTER AMENDMENT

19. (Amended eight times) A method of assembling a multi-chip device comprising:

populating a second surface of an interposer having a first surface and the second surface with a plurality of conductive pads;

coupling solder balls to selected ones of the plurality of conductive pads;
not coupling the solder balls to non-selected ones of the plurality of conductive
pads;

device to the first surface to form a multi-chip subassembly, wherein the at east one passive device is selected from a group consisting of resistors, capacitors, and inductors;

testing said plurality of cache memory devices on said interposer;

coupling said interposer to a substrate with the solder balls and coupling a microprocessor to the substrate after said testing if said plurality of cache memory devices pass said testing; and

not coupling said interposer to the substrate and not coupling a microprocessor device to the substrate if said plurality of cache memory devices does not pass said testing.

1/2

Attorney Docket No. 042390.P5120D

- 21. (Amended three times) The method of claim 19 wherein the interposer comprises organic material.
- 22. (temporarily removed from consideration) (Amended once) The method of claim 19 wherein coupling at least one semiconductor die comprises a C4 process.
- 23. (Cancelled)
- 24. (temporarily removed from consideration) (Amended once) The method of claim 19 further comprising coupling a single chip carrier to the substrate.
- 25. (temporarily removed from consideration) (Amended once) The method of claim 19 wherein coupling at least one semiconductor die comprises coupling memory chips to the interposer.
- 26. (Amended once) The method of claim 19, further comprising:
 creating a plurality of contacts on the substrate; and
 electrically connecting said selected ones of the plurality of conductive pads to the
 plurality of contacts.
